## Communication and presentation skills

**Q.** In near future, AI will be important advancement in vehicles. Like Tesla, already implementing auto pilot in their cars. So this lead to less accidents or less damage to vehicle, how does insurance companies planning to overcome this situation? Are they planning to collaborate with auto companies and find solution and what are the companies currently Liberty Mutual is collaborated with?

**A.** Yes, it's true that technological advancement like AI will lead to less accidents. But for these advancements, vehicle needs advance mechanism and instruments, like sensors, camera. For example, 2014 Subaru and 2016 Subaru are similar but 2016 bumper is nearly twice costlier than 2014 because this bumper is integrated with extra features. So this is where insurance company is going to take leverage. Liberty mutual has collaborated with many auto companies like BMW, Ford etc. they help customers by suggesting Liberty Mutual Insurance.
